### Particulate Blocking Layer

The INNOTEX GRAY™ Interfaces use Stedair® PREVENT to block carcinogenic particulates 0.1 µm to 1.0 µm (microns) by greater than 99%.

NFPA 1971, 2018 edition requires a minimum of 90%.

### Air Permeability

The particulate blocking membrane is air permeable, which means air freely passes through it, letting body heat dissipate and helping reduce the risk of increased core temperature.
