

THE KNEE GUARD THAT FOLLOWS YOUR EVERY MOVE.

INNOTEX
ENDURANCE[™]

Integrated Knee Guard System

INNO
TEX
BE STRONG.
BE SAFE.

INNOTEX
ENDURANCE™

OPTIMAL PROTECTION
AND MOBILITY, ALL IN ONE.

DESIGNED TO FOLLOW YOUR KNEES. NOT YOUR PANTS.

Our innovative patented*
ENDURANCE™ Knee
Guard System features an
ergonomically-designed padded
knee sleeve tethered to the
inside of your pants. Together,
the padding and the adjustable
tether work as a unit to provide
complete, close-fitting, flexible,
and stable knee protection.

The contoured padding wraps around your knees when you kneel, providing full frontal and lateral protection, and releases when you stand, allowing air to flow freely between your knee and the pad. The tethering system lets you adjust the knee sleeve to the desired height and ensures that the protective pad stays securely in place, always exactly where it should be. Made of perforated closed-cell foam, the padding allows for air circulation and doesn't retain water.

**STREAMLINED,
ARTICULATED
3D PADDING**
Provides a flexible
fit. Contours the
knee when kneeling.
Extends a few
inches down over
the top of the shin.

*Brevet US 11,219,784 / *Brevet US 11,752,368 / *Brevet CAN Patent Pending

With the unique Endurance™ Knee protection, I'm confident that all areas of my knees are fully protected, regardless of my position. I can easily transition from being down on one knee to other kneeling positions without having to adjust my pant leg as I would have to do with a traditional style. The knee pads are flexible and comfortable. Donning the pants doesn't require any extra steps, and only a few additional seconds are required at doffing to properly set them up for redonning.

CAPTAIN RICK CEDILLO

LOW-PROFILE, HIGH ON PROTECTION.

The ENDURANCE™ Knee Guard's streamlined design is lightweight, comfortable and flexible, providing superior protection without bulk for optimal mobility whether you walk, run or crawl.

A Heavy-duty abrasion-resistant Kevlar® mesh

Provides air circulation and delivers field-proven durability.

B Perforated 1/2" closed-cell foam

Light and flexible energy-absorbing protection. Retains its shape. Allows proper ventilation and stays dry. Maximizes thermal and compressive protection.

C Internal lining

Slips on easily, wicks moisture away and dries quickly.

D Stretch-knit band

Keeps the padding close to the kneecap without squeezing.

E Attachment band with hook & loop fastening

Attaches to the pant liner's Kevlar®-webbing tether band. Allows knee sleeve to be adjusted to 3 different heights.

F Webbing tether band

Sturdily box-stitched to the reinforced thermal liner.

Quick and easy donning

Designed for hassle-free donning, our knee guard system won't get in the way of your bootstraps. When it's time to go, just grab your bootstraps and pull your pants on as usual: the padded knee sleeve will adjust to your knee. For cleaning or decontamination*, the padded knee sleeve is easy to remove, wash and put back in place.

Ergonomic left knee / right knee design

Provides more robust protection for the outside of the knee and more streamlined protection on the inside for better mobility.

*When paired with our INNOTEX® GRAY™ Particulate-Blocking Interface System, the padded knee sleeve is protected from contamination.

For a custom fit, the ENDURANCE™ padded knee sleeve is offered in **3 sizes**. To determine your size, measure the circumference of your leg directly above the kneecap.

Size	Knee circumference (inches)
M	Less than 18"
L	18" - 20"
XL	More than 20"
